

Comply with CE Standard

► World's tallest self-propelled telescopic boom lift, with a working height of up to 82.3 meters

- Polygonal innovative boom, boom weight reduced by more than 10%, vertical stiffness increased by 25%, torsion resistance increased by 20%, and offers small deformation and stable control

- Double lifting cylinder layout provides more smooth lifting, better boom rigidity and less platform shakes

- X outrigger offers larger working envelope, stronger off-road ability, and better stability

- ▶ Four-wheel steering with intelligent control ensures coordinated movements of the outriggers during travel, steering, and extension. Automatic matching of all-wheel steering angles guarantees straight-line travel

- ▶ Dual-stage telescopic system for efficient and smooth operation
